평등의 기회와 평등한 기회를 적극적으로 실현해야 할 필요가 있다.

Kok Sar 님 USA:
Transparent and independent judicial systems are
prerequisite for economic development. Local and foreign
investments are the backbone of macroeconomy, and
these investments can happen only when investors are
guaranteed with full prosecution by strong and objective
legal mechanism. Unfortunately, however, every scandal
involving the Cambodian courts sends strong messages to
investors especially foreign ones that the environment for
investments in Cambodia is such and they should not
come in to invest. If there is No investment, there will be
No economic growth. No jobs created, and unemployment
will increase, and as a result, poverty will be pandemonium.
Poverty is not only the food security problem and the
great threat to national security, political stability and social
unrest! Samdech Hun Sen should keep his eyes on true
and genuine reform of the judicial systems.
